DOCUMENTATION

BOXCOIN SAAS FOR RESELLERS

Thank you for joining the reseller program! Please complete the steps below to start your new business with us.

POINT YOUR SUBDOMAIN TO OUR SERVER RESELLER VERSION ONLY

1. Edit the DNS settings of your domain and add:

   a. Record type A with an empty string or your domain as hostname, and "18.135.143.205" as value

   b. Record type CNAME with "www" as hostname and your domain without www as value

2. We will only install BOXCOIN on the given domain, we will not upload any landing pages or websites. For this reason, consider using a subdomain like pay.example.com

INFORMATION YOU MUST SEND US

Please send us all the information below. The services below are paid services but they include free tiers and free versions that will allow you to use them for free for your first customers. You can email the information to support@boxcoin.dev. If you have the SaaS version you do not have to send us the information, instead enter them in the config file.

Smtp

1. SMTP Host
2. SMTP Username
3. SMTP Password
4. SMTP Port
5. SMTP Sender email
6. SMTP Sender name

How to get the information

1. You can use any SMTP server but make sure it works correctly and emails are not sent to SPAM folder. Some of the best providers are https://sendgrid.com/ and https://www.smtp.com/

Stripe

Stripe is available only in the countries listed at https://stripe.com/global. If your country is not listed use 2Checkout instead, details are below.

1. Live Secret Key
2. Live Product ID (send only 1 product ID)

How to get the information

1. Register a Stripe account at https://dashboard.stripe.com/register (if Stripe is not available in your country, use 2Checkout instead, details are below)
2. Activate your account at https://dashboard.stripe.com/account/onboarding

3. Visit https://dashboard.stripe.com/webhooks/ and add an end point, in "Endpoint URL" enter "https://your-domain/account/stripe.php" (replace your-domain with your domain of point 1). Listen for the following events: "checkout.session.async_payment_failed", "checkout.session.async_payment_succeeded", "checkout.session.completed", "checkout.session.expired", "invoice.paid", "invoice.payment_failed"

4. Create a new product at https://dashboard.stripe.com/products/. Enter the product name and add a new price for each BOXCOINsubscription you want to offer to your customers. Each price must have the following settings:

   a. Pricing model: Standard pricing
   b. Tax code: Software as a service (SaaS)
   c. Recurring
   d. Billing period: all values except "custom" are supported
   e. Include tax in price: No

5. Save the product and open it, you must send us the ID. Ex. prod_KeiX3uOIziW5UH. Send only 1 product ID.

6. Get the secret key from https://dashboard.stripe.com/apikeys

Stripe Webhooks

Please visit https://dashboard.stripe.com/webhooks and add a new webhook, and as URL enter your cloud domain + "/payment/stripe.php". Example: https://cloud.boxcoin.dev/payment/stripe.php. As Events to send select only checkout.session.completed.

2Checkout

Stripe is the recommended payment provider. Use 2Checkout only if you cannot use Stripe.

1. Secret Key
2. Secret Word
3. Merchant ID
4. Currency symbol

How to get the information

1. Register a 2checkout account at https://www.2checkout.com/. You can choose the plan you prefer.

2. Go to https://secure.2checkout.com/cpanel/webhooks_api.php (Integrations > Webhooks & API).

   a. In the "Redirect URL" box check "Enable return after sale" and as URL enter your cloud domain + "/account?tab=membership". Example: https://cloud.board.support/account?tab=membership

   b. In the "Instant Notification System (INS)" box check "Enable INS" and "Enable global URL" and as URL enter your cloud domain + "/verifone.php". Example: https://boxcoin.dev/verifone.php

   c. Send us: Merchant Code, Secret Key, Buy link secret word

3. You will need to activate and verify your account before starting selling to real customers but you can use the payment details of the following page for testing purposes: https://bit.ly/36AcH0R

Texts and Emails

1. The subject and text of the welcome email, example:

Welcome to Boxcoin

*Hello!
You have successfully registered an account with Boxcoin. Thank you for choosing Boxcoin! We \'re thrilled to have you with us. To get started and to learn how to use Boxcoin visit our docs at https://boxcoin.dev/docs/.*

2. The disclaimer text, example:

*By creating an account you agree to our Terms Of Service and Privacy Policy.
© 2022 boxcoin.dev. All rights reserved.*

3. The footer email text, example:

*This email was sent to you by Boxcoin. By using our services, you agree to our Privacy Policy.
© 2022 boxcoin.dev. All rights reserved.*

If you are installing the SaaS version, these texts must be inserted in the *config.php* file. Constant names: *CLOUD_WELCOME_EMAIL, CLOUD_EMAIL, CLOUD_DISCLAIMER*.

Open Exchange

Register an account at https://openexchangerates.org and send the App ID. Get it from https://openexchangerates.org/account/app-ids.

Blockdaemon

Register an account at https://openexchangerates.org/https://www.blockdaemon.com and send the API Key. Get it from Left menu > API Suite > Get API Key

Tatum

Register an account at https://openexchangerates.org/https://tatum.io and send the API Key. Get it from https://dashboard.tatum.io/.

Addresses

Provide the crypto addresses of the cryptocurrencies you want to accept payments from. The supported cryptocurrencies are listed at https://boxcoin.dev/features#cryptocurrencies

Your business and brand details

1. Your business name

2. Your logo. The logo should be in vertical mode (logo on left, text on right), in SVG format, with transparent background, no spaces around.

3. Your icon. The icon should be square size, in SVG format, and with transparent background, no spaces around.

4. Your company details for tax purpose, we will send you the invoices with the details provided here

5. Your documentation URL (optional)

INFORMATION FOR YOU

1. The default language is English, if you want another default language let us know by email. The language can also be automatically detected from the user's browser language.

2. You can use our website for marketing reasons and for creating the website of your Boxcoin SaaS. Of course, you need to search and replace all Boxcoin names, links, and related brand images. You can download our website optimized for the SaaS version at https://boxcoin.dev/docs/files/website.zip

3. Customers will use your SMTP server as default server for all emails.

4. Customers must purchase credits from you to use Boxcoin. Boxcoin charge a 0.08% fee of the amount of the transaction. When the credits are finished, the checkout will stop working and the user will have to purchase new credits. If you want to use a custom fee, or multiple fees based on the transaction amount, sent the fee values to us.

5. Customers receive email notifications when their credit is finished.

6. We will send you an invoice for the payment of the fixed 10% fee of the earnings generated by your customers. We will email you the invoice every month or when you reach the $ 50 threshold.

7. If in the future your business is sold to another entity, the new entity is obligated to honour the license and pay us the 10% fees.

8. You can not create a PHP script with similar features of Boxcoin. You can not create a Boxcoin plugin similar to the WordPress version Boxcoin. You can not promote your Boxcoin version on appsumo.com or Envato.

Thanks! You can email the information to support@boxcoin.dev. If your domain configuration and all information provided are correct, your reseller account will be ready within 48 hours.
